# Silt Fence

## Description

Silt Fence is a temporary barrier of geotextile fabric used to retain silt and sediment and avoid silt pollution into rivers, drains and sensitive environments.

## Applications

Prevents sediment movement from:

- Soil stockpiles
- Swale drains
- Riparian batters
- Steep batters
- Spillways
- Floodways

PROPERTY	TEST METHOD	Silt Fence SF100X
ROLL SIZE		1m x 50m
MATERIAL		Woven UV stabilised polypropylene
COLOUR		Green/black
GRAB STRENGTH (md/cd)	ASTM D4632	500N
APPARENT OPENING SIZE (AOS)	ASTM D4751	0.5mm
UV RESISTANCE (retained strength)	ASTM D4355	70%

The information contained in this brochure is general in nature. In particular the content of this brochure does not take account of specific conditions that may be present at your site. Site conditions may alter the performance and longevity of the product and in extreme cases may make the product wholly unsuitable. Actual dimensions and performance may vary. If your project requires accuracy to a certain specified tolerance level you must advise us before ordering the product from us. We can then advise whether the product will meet the required tolerances. Where provided, installation instructions cover installation of product in site conditions that are conducive to its use and optimum performance. If you have any doubts as to the installation instructions or their application to your site, please contact us for clarification before commencing installation. This brochure should not be used for construction purposes and in all cases we recommend that advice be obtained from a suitably qualified consulting engineer or industry specialist before proceeding with installation. This brochure is current as at the date printed below. Geofabrics New Zealand Ltd may make amendments to this document at any time. Please refer to our website, or contact our nearest sales office to ensure you have the most current version. © Copyright held by Geofabrics New Zealand Ltd.
