

# Control of Substances Hazardous to Health Regulations 1988

<b>Products</b>	Tensar geogrids, non-knitted geotextiles and other polymeric products (e.g. bodkins, connectors, braid, pegs).
<b>Physical &amp; chemical characteristics</b>	These products are manufactured from materials that are non hazardous to health and therefore no special precautions are necessary.
<b>Hazard identification</b>	<ol style="list-style-type: none"><li>1. There may be a risk during handling of cuts or abrasions when handling the more rigid geogrids or needle punched geotextiles which may contain small metal pieces, it is recommended that gloves be worn.</li><li>2. In the event of a fire involving these products, care should be taken to avoid inhalation of smoke.</li><li>3. Due consideration should be given to the weight of the rolls when being handled.</li></ol>
<b>Protective clothing</b>	The gloves recommended above should conform to BS EN388 with a 4.2.2.4 rating or better.
<b>Disposal</b>	The materials used in these products pose no ecological threat. They can therefore be disposed of responsibly via suitable incineration equipment or landfill in accordance with the local regulations.

The information in this document is of an illustrative nature and is supplied without charge. It does not form part of any contract or intended contract with the user. Final determination of the suitability of any information or material for the use contemplated and the manner of use is the sole responsibility of the user and the user must assume all risk and liability in connection therewith.
